

## A Missing time point

Every day-7 cell is excluded from training.  
All donors contribute the other time points.

Training

Prediction source

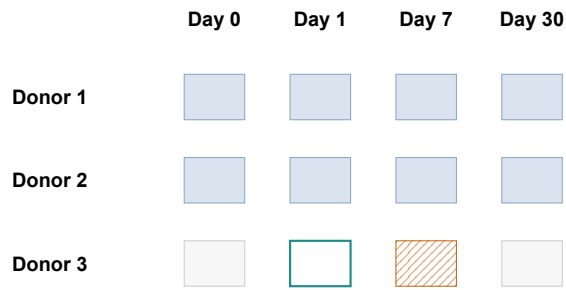

Held-out target

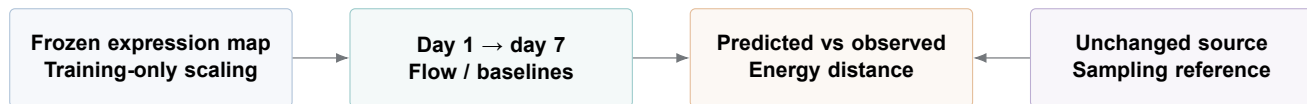

Unused

## B New donor: example fold

All cells of the test donor are excluded from training.  
Its observed day-1 cells initialize prediction.

## C Common evaluation and complementary sensitivity analyses

Time coordinates · training donors · training seeds · numerical resolution · evaluation sampling

Three healthy human donors; separate mouse comparison; no DFU healing endpoint
